

Single sign-on integration

One login for all your financial needs

MeridianLink[®] Access now integrates directly with the Jack Henry[®] Banno Digital Platform[™], enabling instant, authenticated single sign-on (SSO) access to lending and account services through the digital channels your members and customers use every day.

Three steps. Zero friction.

1. CONSUMER LOGIN

Authentication occurs within Banno, no second password required.

2. SSO HANDOFF

Banno passes a secure token to MeridianLink Access for transparent, real-time ID verification.

3. INSTANT ACCESS

The consumer is immediately directed to MeridianLink Access within Banno, ready to apply, check application statuses, or manage their loan.

Why integrate Access & Banno?

SEAMLESS, UNIFIED EXPERIENCES

Move from digital banking to lending without re-entering credentials—all while keeping consumers within your branded digital environment.

HIGHER CONVERSION

Fewer authentication barriers and embedded SSO make it easier to move through applications, raising completion and conversion rates.

STRONGER SECURITY

SSO consolidates authentication into a single session managed by Banno, keeping all credentials stored in one secure location to reduce risk.

FAST IMPLEMENTATION

Since Access is pre-integrated with Banno, your IT team doesn't need to spend months building the integration from scratch. Configure, test, and go live in just days!

Get the integration

Contact your MeridianLink Account Executive to learn more and enable the Banno SSO integration for Access within your institution.
